PLAYERS & DECKS

1 THE DEAL

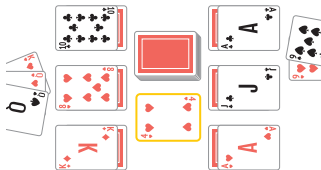

This is the toughest part of the game, each player gets 9 cards. Three face down in front of them. Three face up on top of the first three. Plus three cards in their hand.

2 THE PLAY

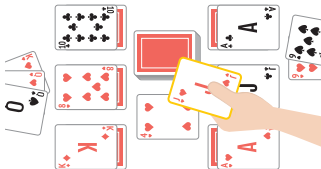

Play begins by only using the cards in the player's hand. Whoever plays a 4 into the center goes first. If no player has a 4 then the player with the lowest card goes first.

3 PICK UP A CARD

The player that went first, then picks up a card from the deck e.g. J. All players must have three cards in their hand until there are no cards left in the deck.

Players take it in turns to first play a card of the same or higher values, then pick up a card from the deck.

4 PICK UP THE PILE

If a player cannot play a higher card then they must pick up all the cards in the pile. The next player can then play any card from their hand.

5 FOUR OF A KIND OR TENS

If a player has multiples of the same card they can be played together. Four of the same card or a 10 burns the pile. The player gets another turn.

6 TRUMPS

These cards require actions from the next player. There are two types of trumps that can be played:

7 CARDS IN FRONT

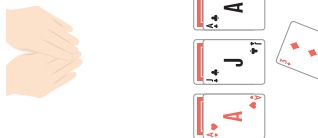

When all cards from the deck have been taken and a player has no cards in their hand, then one of their three face up cards can be played e.g. [8].

8 FACE DOWN CARDS

Once all three face up cards have been played, a face down card can be played e.g. [10]. Players turn over one card only, ensuring opponents see the card first before it's placed on the pile.

9 THE WINNER & THE SLIME HEAD

The game continues until there is only one player left. They are the loser and can be referred to as the 'Slime Head'. The 'Slime Head' deals a new round.
